Dell PowerStore Deploy

2023

Certification Exam

QUESTION: 1

How many volumes can be created at a time using the PowerStore Manager?

- A. 64
- B. 100
- C. 123
- D. 200

Answer(s): B

QUESTION: 2

What are two properties of the VMware file system which are supported by PowerStore?
(Choose two.)

- A. Supports VAAI primitives
- B. Available with NFS datastores
- C. Supports quotas
- D. Available with VMFS datastores

Answer(s): A, D

QUESTION: 3

The wan connection between the production and DR sites has a low latency of <5 milliseconds.
Which firewall port is used by PowerStore to communicate between sites?

- A. 13333
- B. 13335
- C. 13334
- D. 13336

Answer(s): A

QUESTION: 4

What is the maximum number of supported replication and snapshot rules in a protection policy?

- A. One snapshot rule and four replication rules
- B. One snapshot rule and one replication rule
- C. Four snapshot rules and one replication rule
- D. Four snapshot rules and four replication rules

Answer(s): C

QUESTION: 5

In a PowerStore T source cluster create a 100GB volume with name "Prod_vol" with a category of "Other". Set its protection policy to replicate the volume with an RPO of 30 minutes to Cluster1. The destination cluster is already configured.

When you have finished, continue to the next question.

A. See Explanation section for answer.

Answer(s): A

Explanation:

1. Log in to the PowerStore Manager of the source cluster.
2. From the top menu, click Storage and select Volumes from the drop-down list
3. Click Create and enter the following information:
4. Name: Prod vol
5. Description: (optional)
6. Quantity: 1
7. Size: 100 GB
8. Application Tag: Other
9. Click Next and select the protection policy that has a replication rule to Cluster1 with an RPO of 30 minutes. If there is no such policy, click Create and follow the steps to create a new protection policy with a replication rule
10. Click Next and review the summary of the volume creation.
11. Click Create to create the volume and start the replication session to Cluster1.

QUESTION: 6

At what point in the configuration of an External Storage import session does the data path from the host to the PowerStore system become the active I/O path?

- A. When the import session begins
- B. As MPIO restarts on the host
- C. Before launching the Import Storage wizard
- D. During the ImportKit installation

Answer(s): B

QUESTION: 7

Which statement about File Mobility Network configuration is correct?

- A. File mobility network is created on the same subnet and VLAN as the management network
- B. File mobility network is created with an optional Cluster IP
- C. File mobility network is created on the same subnet and VLAN. as the storage network
- D. File mobility network is created under the management tab in PowerStore Manager

Answer(s): A

QUESTION: 8

What are two minimum requirements for using VMware Site Recovery Manager (SRM) with PowerStore? (Choose two.)

- A. VMware SRM version 8.3 and newer
- B. VMware SRM version 8.0 and newer
- C. VMware vCenter Server and ESXi hosts version 6.5 and newer
- D. VMware vCenter Server and ESXi hosts version 6.7 and newer
