QUESTION: 1

DRAG DROP (Drag and Drop is not supported)

What should be Included in an Executive Summary? (Place the correct Items into the list at the right Order is no: Important Not all options will be used)

POSSIBLE INCLUSIONS		CORRECT INCLUSIONS
brief summary		
contact information		
high-level design		
job roles		
purpose of the document		
recommended cabling	➤	⬆
recommendations	⬅	⬇
scope		
target audience		

A. See Explanation section for answer.

Answer(s): A

Explanation:

For an Executive Summary, typically the following items should be included:

Brief Summary
 Contact Information
 High-Level Design
 Purpose of the Document
 Recommendations
 Scope
 Target Audience

QUESTION: 2

A customer wants to have the ability to show network usage.
 Which product would allow them to have this visibility?

- A. Central
- B. ClearPass
- C. UXI
- D. Aruba OS 8.X

Answer(s): A

Explanation:

Aruba Central provides a cloud-based management platform for managing and monitoring Aruba Instant APs, switches, and branch gateways. It offers a comprehensive dashboard that gives insights into network usage, health, and performance metrics. Central allows network administrators to have visibility over their entire network infrastructure from a single pane of glass, including detailed usage statistics, which can be broken down by device, application, and time. This visibility into network usage is crucial for optimizing network performance, planning capacity, and understanding user behavior. Aruba Central's analytics and reporting capabilities enable customers to track and analyze network usage, making it the appropriate product choice for customers wanting to monitor their network usage closely.

QUESTION: 3

The client's existing network is experiencing trouble with voice occasionally dropping out on phone calls between office locations. It is determined that no packet loss is occurring and QoS is likely the cause. With what phenomenon is the client currently experiencing issues?

A.

B.

C.

Answer(s): B

Explanation:

The client is experiencing issues with Jitter, as depicted in Option B. Jitter refers to the variation in time between packets arriving, caused by network congestion, timing drift, or route changes. In voice communications, jitter can manifest as the occasional dropping out of voice on phone calls because the variable delay can affect the steady stream of voice packets needed for a clear conversation. Even when there is no packet loss, high levels of jitter can significantly impact the quality of Voice over IP (VoIP) calls. Quality of Service (QoS) settings are essential in managing jitter, as they can prioritize voice traffic over other types of data, ensuring that voice packets are delivered consistently and in the correct order to minimize delays and prevent call quality degradation. Aruba Campus Access solutions would typically include QoS features to manage and mitigate jitter on the network.

QUESTION: 4

You are presenting your network design solution to your customer. What is important to include in your presentation?

- A. protocols that will be used to make your solution work
- B. your rollback plan
- C. your experience with this kind of project
- D. tangible and intangible returns for the customer
