Google

Cloud Digital Leader

Exam Sections:

1. Digital Transformation with Google Cloud
2. Exploring Data Transformation with Google Cloud
3. Innovating with Google Cloud Artificial Intelligence
4. Modernize Infrastructure and Applications with Google Cloud
5. Trust and Security with Google Cloud
6. Scaling with Google Cloud Operations

QUESTION: 1

What does the shift toward cloud computing represent for an organization's transformation?

- A. An opportunity that is limited to large enterprises
- B. An opportunity to redefine existing business processes and services
- C. An opportunity that is only relevant to the IT department
- D. An opportunity to continue business as usual with new cost savings

Answer(s): B

QUESTION: 2

An organization is using new technologies to change its business processes and culture to develop new customer experiences and adapt to market dynamics.

What is the name of this approach?

- A. Digital transformation
- B. Data center migration
- C. Operations optimization
- D. User personalization

Answer(s): A

QUESTION: 3

An organization is deploying applications to the cloud using platform as a service.

In the shared responsibility model, what remains the responsibility of the customer organization?

- A. Operations
- B. Data access policies
- C. Physical security
- D. Network security

Answer(s): B

Explanation:

In the shared responsibility model, while the cloud provider manages the underlying infrastructure and platform security, the customer organization is responsible for data access policies, ensuring that only authorized users have access to their data and applications.

QUESTION: 4

An organization decides to migrate their on-premises environment to the cloud. They need to determine which resource components still need to be assigned ownership.

Which two functions does a public cloud provider own? (Choose two.)

- A. Hardware maintenance
- B. Infrastructure architecture

- C. Infrastructure deployment automation
- D. Hardware capacity management
- E. Fixing application security issues

Answer(s): A, D

QUESTION: 5

Your multinational organization has servers running mission-critical workloads on its premises around the world. You want to be able to manage these workloads consistently and centrally, and you want to stop managing infrastructure.

What should your organization do?

- A. Migrate the workloads to a public cloud
- B. Migrate the workloads to a central office building
- C. Migrate the workloads to multiple local co-location facilities
- D. Migrate the workloads to multiple local private clouds

Answer(s): A

QUESTION: 6

Each of the three cloud service models - infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) - offers benefits between flexibility and levels of management by the cloud provider and the customer.

Why would SaaS be the right choice of service model?

- A. You want a balance between flexibility for the customer and the level of management by the cloud provider
- B. You want to minimize the level of management by the customer
- C. You want to maximize flexibility for the customer.
- D. You want to be able to shift your emphasis between flexibility and management by the cloud provider as business needs change

Answer(s): C

QUESTION: 7

Your company has recently acquired three growing startups in three different countries. You want to reduce overhead in infrastructure management and keep your costs low without sacrificing security and quality of service to your customers.

How should you meet these requirements?
